

premium pull up banner (1200mm x 2170mm)

Visual area: 2170(h) x 1200(w)

Ensure that all text and logos are kept within this area.

Bleed area(s):

These areas are required for attachment to the system, they are inserted into the frame, and are not visible when erect.

For a clean finish on your display make sure any background colours or graphics bleed off into these areas.

Ensure this area is included in the artwork and is 200mm when at full size (if creating artwork at half size it will be 100mm, quarter will be 50mm etc). It is important for the system's operation.
